DETAILED ACTION

1. This office action is in response to the amendment of October 17, 2009.
2. The examiner acknowledges the amendments to claims 1, 3-13, and 15-27. The examiner notes that claims 14 and 28-46 have been canceled.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- a. In the Abstract the disclosure of:
 - "which links said side members"will be amended to recite:
 - --- which links the ~~said~~ side members ---
- b. **Claim 1** the limitations of
 - i. The limitations of
 - "and a plurality of functional units functional units"will be amended to recite:
 - --- and a plurality of functional units ~~functional units~~ ---
 - ii. The limitations of
 - "which core pump is prefabricated in modular manner, and the material supply container which is rigidly connected with the core pump"

will be amended to recite:

- --- wherein the ~~which~~ core pump is prefabricated in a modular manner, and the material supply container ~~which~~ is rigidly connected with the core pump ---

c. **Claim 17** the limitations of

iii. "from the control module to the drive subassembly run on the longitudinal side members"

will be amended to recite:

- iv. --- from the control module to the drive subassembly and run on the longitudinal side members ---

Allowable Subject Matter

4. Claims 1 and 3-27 allowed.

5. The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest the limitations for a mobile concrete pump incorporated with a truck chassis including a frame, a building frame fixed to the frame of the truck chassis and comprising two longitudinal side members mutually spaced apart by a free space, and a stabilizing device with extendable support legs; in combination with a core pump is prefabricated in modular manner having a material supply container rigidly connected with the core pump, a plurality of functional units which form a distribution mast mounted on the building frame, wherein a drive subassembly for actuating the plurality of functional units, and the core pump are located in the free space between the two longitudinal side members, and wherein the building frame comprises a floating

bearing linking said side members across the free space, as well as a releasable fixed bearing arranged at the rear end of the building frame for releasably supporting the core pump for removal of the core pump from the building frame, wherein the core pump can be introduced from the back end of the building frame through the free space and is connectable with the floating bearing and the fixed bearing.

The prior art of Takayuki JP 11245710 teaches a pump that is mounted on a truck chassis near a hopper. The pump is mounted on two subframes and the sloped face of a supporting frame, and the hopper is mounted on a supporting frame that extends from one of the subframes that the pump is mounted to. Takayuki JP 11245710, English Translation of Abstract. Fenzl DE 3122725 a concrete pump installed on a lorry chassis with a supporting frame in which the substructure of rotary column and a rear support is facilitated by connecting members. Fenzl teaches that all substructures can be attached to the connecting members. Fenzl teaches that the connecting members can be used as containers for holding fluids, and the entire structure can be completely premounted. Fenzl DE 3122725, English Translation of Abstract.

Takayuki and Fenzl do not teach the specific limitations of a core pump with a material container attached thereto, mounted on to a building frame using fixed bearing and a floating bearing. The instant references do not teach a floating bearing linking side members across a free space and a releasable fixed bearing arranged at the rear end of the building frame for releasably supporting the core pump for removal of the core pump from the building frame.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
